ULTRASONIC DISHWASHING SYSTEMS

An ultrasonic dish washer can be used in a hotel for efficient, high-frequency cleaning of items like kitchenware, cutlery, glassware, and delicate equipment, leveraging high-frequency sound waves to remove dirt, grease, and contaminants. This technology ensures hygiene, saves labor and time, extends the life of utensils, and helps maintain high cleanliness standards for operational efficiency.

ADVANTAGES :

Without the use of special cleaning agents

Cleaning with no dead corner, dishes without arranged neatly

Can replace the manual scrubbing process, saving manpower

Washable in large pot or large kitchen appliances

Stainless steel # 304, durable, can replace the existing sink

With leakage circuit breakers, safe and secure

Simple operation, easy to use, is a "good helper" on your business.

Digital timer controller 0 to 99 Minute

BENIFITS :

Enhanced Hygiene:

Provides deep cleaning and ensures that utensils and equipment are thoroughly sanitized.

Time and Labor Savings:

Significantly reduces the manual labor and time required for cleaning.

Improved Efficiency:

Streamlines cleaning processes, contributing to overall operational efficiency within the hotel.

Cleaning Complex Items:

Effectively cleans intricate and hidden parts of objects that are difficult to reach with traditional methods.

Any metal can clean without scratches & damages
